OUR STORY CONTINUES...

Since 1979, the Baffin Brand was born from a genuine love for the country in which it resides. With Canada's uncompromising landscapes and rugged extremities, there was a need for Footwear that could provide the utmost protection from those elements.

Baffin believes in designing for extreme performance in challenging conditions; so we make the most well thought out, durable and dependable Footwear and Apparel possible, for you to focus on the task at hand without giving your gear a second thought.

We believe that product testing shouldn't end in a factory or lab, so we take our gear to the most extreme environments on the planet and real-world test everything we produce. Our product performs there, so we're confident it will perform for you – regardless of the elements.

A handwritten signature in white ink, appearing to read 'P. Hubner'.

Paul Hubner, President & CTO (Chief Testing Officer)

THE INSOLE STORY

At Baffin we believe that each and every component of our footwear is of equal importance. Our approach to insole technology is no different than the approach to any aspect of our innovative products.

We have designed each insole in consideration with the footwear they will be a part of, so that the entire

product functions as a cohesive system to support the movement and engagement of the foot during activity.

Please read below for a better understanding of what lies within a Baffin boot.

INSANE COMFORT MNST-M100

INSANE COMFORT

Hands (and feet) down, the most comfortable insole there is. The Insane Comfort opens with a breathable, soft-top for next-to-foot comfort, and a plush layer of memory foam. Next, a dual-density construction combines with anti-fatigue touch points under the heel and fore-foot. All in a form-fitting shape to hug and support your every step-and-standing moment.

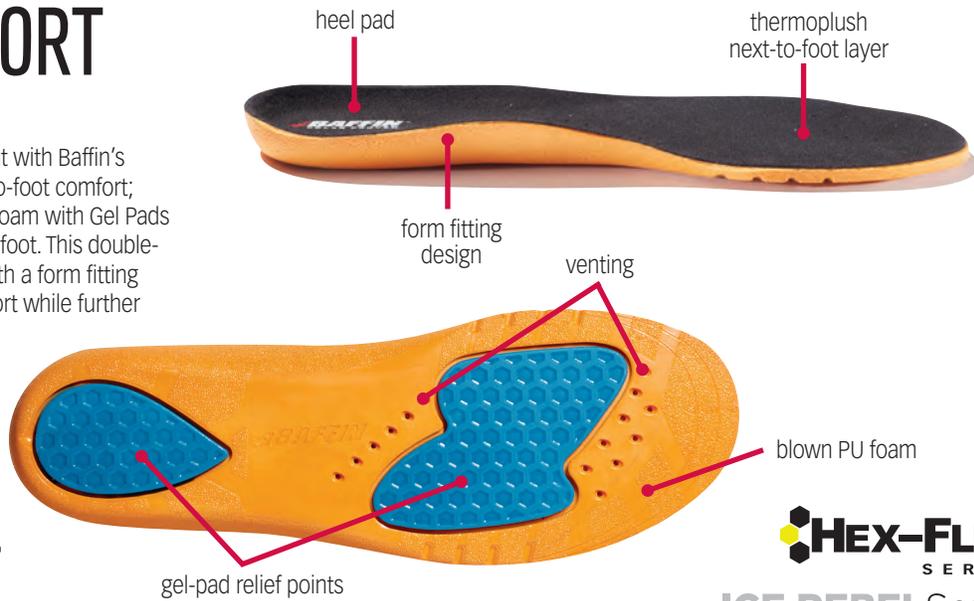

BBI Black
SIZE 7 - 14 (8^{1/2}, 9^{1/2}, 10^{1/2})

THE INSOLE STORY

DUAL COMFORT FLEX-M100

Our Dual Comfort insole starts out with Baffin's signature Thermaplush for next-to-foot comfort; then we've combined blown PU foam with Gel Pads under the high-use areas of your foot. This double-compound approach, coupled with a form fitting & flexible design, improves comfort while further reducing fatigue.

BBI Black
SIZE 7 - 14 (8 1/2, 9 1/2, 10 1/2)

HEX-FLEX
SERIES
ICE REBEL Series
WORK BOOTS

INSTANT COMFORT CFLX-M100 CFLX-U100

The name says it all - unique to our Instant Comfort series, this insole is also instantly comfortable. Our dual-depth insole promotes cushioning with its high-bounce, lite-blown PU foam; which we made deeper in the heel and ball of the foot, so you'll always be in your "Comfort Zone".

DESIGNED FOR INDUSTRIAL USE

Compound Philosophy: At Baffin we always use premium, high-quality raw materials to produce our various finished compounds for moulded bases and fully moulded boots. Various materials are sourced with the applications for which they will be used in mind.

Safety Certifications: All of Baffin's safety footwear is designed to perform for the applications in which they are to be used. We ensure that in pursuing CSA, ASTM and CE certifications, that we not only meet the standards but exceed them. Please contact Baffin regarding any specific certification performance criteria or industry specific applications.

DESIGNED FOR INDUSTRIAL USE

Polar Proven Protection: The technology in our removable liner footwear has been tested at both the North and South Poles. Our footwear performs in those extreme environments. The multi-layer inner boot system creates a comfortable environment for your foot to retain heat and block out cold. Body moisture is wicked away by a Hydromax II layer and combined with a B-Tek four channel hollow fibre layer to act

as a moisture control system. This keeps the foam dry and funnels water vapour out of the boot, as opposed to felt packs used in other boots that compress over time and retain water. Our Thermoplush is a chamois leather-like material that feels remarkably soft and smooth. A vaporized aluminum membrane rounds out the system, which has a silver surface to reflect energy back toward the foot.

Compound Philosophy: At Baffin we always use premium, high-quality raw materials to produce our various finished compounds for moulded bases and fully moulded boots. Various materials are sourced with the applications for which they will be used in mind.

Safety Certifications: All of Baffin’s safety footwear is designed to perform for the applications in which they are to be used. We ensure that in pursuing CSA, ASTM and CE certifications, that we not only meet the standards but exceed them. Please contact Baffin regarding any specific certification performance criteria or industry specific applications.

MET: Metatarsal Guard, Safety Toe and Plate | **STP:** Safety Toe and Plate | **TOE:** Safety Toe | **PLN:** Plain Toe

INDUSTRIAL BOOT CHEMICAL RESISTANCE

FIVE DIFFERENT TYPES OF COMPOUNDS ARE USED IN THE CONSTRUCTION OF BAFFIN INDUSTRIAL FOOTWEAR

TR - Traditional Thermoplastic Rubber

PVC - Traditional Polyvinyl Chloride resistant compound

Ultraflex - An oil and acid resistant compound that exhibits high abrasion resistance

Oarprene - An oil and acid resistant rubber that will stay flexible at low temperatures

PU - Polyurethane - An oil, acid and abrasion resistant compound specifically engineered for the North American market

APPAREL COLLECTION

One of the most important questions we're asked has always been "what are the best socks to wear with your footwear?" so, we took great care in designing the Baffin® sock program. We can confidently answer that question with: "Baffin® socks". Our assortment considers Baffin® Footwear heights and multi-layer lining systems to offer a range of sock options, which address all of your cold weather and all season needs.

SERIES FEATURES

- Specifically designed for use with Baffin® Inner Boot Systems
- Multiple height options for different Footwear heights
- Calculated blends of natural and synthetic fibers for maximum performance
