'TOM's' Temporary Overlay Markers

TOM-W2 (White)
TOM-Y2 (Yellow)

After the completion on a new paving job, Temporary Overlay Markers (TOMs) provide delineation on the road until lines can be painted on the new surface. Depending on weather conditions, TOMs are often required to last several weeks until paint can be applied. TOMs will work right for you the first time because they are designed with the highest quality and workmanship.

Two standard colors - white and yellow - can be made reflective on one or both sides. All TOMs feature a high tack butyl adhesive pad, that provides for "peel and stick" quick installation to the roadway.

Guardrail Markers

Small Guardrail - used to mount on IBeam guardrail

Large Guardrail - used to mount on wood posts on guardrail

Both available in yellow and white diamond grade reflective

110W- Small Guardrail Markers, White
110A- Small Guardrail Markers, Yellow

103A- Large Guardrail Markers, Yellow

Linear Delineation System

Made with 3M Diamond Grade Prismatic Sheeting

Laminated on Aluminum

Provides superior visibility on concrete barriers and metal guardrails

Easy to install

Reflective Panels

- Vertical Reflectivity
- Safe, No Sharp Edges
- Mount in Seconds
- Non - Corrosive

BSS- Square Post
BSX- U-Channel Post
BSR- U-Channel Post
BSD- Square or Round Post
BSF- Wood Post

5' Orange Fibre Glass Single Spring Culvert Marker

Used to identify the end of drains, culverts and locations of other utilities during winter months.

Bright orange tubing alerts snow removal machine operators of the exact culvert or utility location.
