

Flashing LED Stop Sign

Model: RA1-24S-XX

Solar Powered Flashing Stop Sign

The RA1-24S Solar-Powered Flashing Stop Sign is a regulatory sign with embedded LEDs, specifically designed to enhance the visibility of a static traffic sign. Eight (8) LED lights are placed along the sign's borders at the point of each angle to emphasize the unique shape of the sign. The embedded LEDs emit a red light, employing a simultaneous flash pattern at a rate of approximately 50-60 times per minute. The RA1-24S is offered in a variety of sizes; 60cm, 75cm, 90cm and 120cm.

Known for its extreme weather performance, low cost and ease of installation the RA1-24S is a smart choice for a variety of applications.

FoxCanada is an ISO9001:2015 Certified Company.
